

Oregon Contract Management (OCM)

OCM is a subsidiary of Oregon Timber Frame Ltd, and provides our frame erection service for the business.

Our team consists of a General Manager, a Health and Safety Manager and Contracts Managers, who between them have over 90 years experience in high quality timber frame erection.

Our qualified sub-contract joiners are 100% CSCS compliant and trained to UKTFA/City and Guilds accredited (or equivalent) standards.

Philosophy

Our ethos is safety and quality. OCM's excellent site practice has been recognized by our customers with numerous awards for 'best subcontractor'.

Quality

Our Contracts team are UKTFA Bronze, Silver and Gold registered assessors and are all qualified Appointed Persons for lifting operations. They are viewed as the best in the industry, and continuously strive to improve their skills and knowledge and push the boundaries of best practice.

Health & Safety in Site Practice

We start with good design and detailing, making buildings simple and safe to build. We then take further risk out of the process by using floor cassettes and building the roof on the slab – all lifted into position by our crane. In addition, we use the best materials, ensuring our frames are always fit for purpose.

During the erection process our Contracts Managers and Health and Safety Manager (who is NEBOSH qualified), keep in very close contact with site personnel.

Delivering safe, sustainable solutions for today's construction industry
